

Nonionic Surfactant, Drift Control, Deposition Aid, Penetrant

HOW IT WORKS

- GroCentric™ is a tank mix adjuvant formulated to provide optimal pesticide spray performance by enhancing deposition of the spray application
- Suppresses off-target drift of spray applications by providing a more uniform pattern and velocity of the spray droplets
- Can be used with air assist and conventional spray nozzles
- Maximizes pesticide performance by improving spray coverage and through enhanced retention and infiltration of the targeted leaf surface

PRODUCT BENEFITS

- Improves spray deposition
- Improves canopy penetration
- Enhances spray droplet sticking and spreading for more coverage
- Nonylphenol Ethoxylates (NPE) free, therefore should not contribute to arrested ear

MAXIMIZE PESTICIDE COVERAGE WITH PRECISION SPRAY APPLICATION

CROPS

Corn, Soybeans, Wheat and
Cereal Grains, Alfalfa, Hay, &
Forages

USE RATE

4 fluid ounces for
ground application

2 fluid ounces for
aerial application
