

Humectant and Nonionic Surfactant

Derived from: Surfactants and Paraffic Oils

HOW IT WORKS

- GroNIS™ is a nonionic surfactant formulated for increasing the efficacy of various agricultural spray applications, where wetting and uniform coverage of the spray is required. GroNIS improves the performance of the active spray ingredients by giving more uniform distribution and better wetting of the plant surface.
- It is intended for use with pesticides that are labeled for agricultural and non-agricultural uses. Some pesticide labels recommend a higher or lower surfactant use rate for optimum efficacy. Follow the pesticide label directions when this occurs.
- It can be used with most insecticides, fungicides, herbicides, defoliants, and desiccants to improve the performance of the active spray ingredients by giving more uniform distribution and better wetting of the plant surface.

PRODUCT BENEFITS

- Reduces the contact angle of the spray solution for better coverage and surface area contact for enhanced pesticide activity
- Improves pesticide uptake and activation
- Better handling characteristics

IMPROVED PESTICIDE EFFICACY WITH BETTER WETTING AND UNIFORM COVERAGE

CROPS

Corn, Soybeans, Wheat and
Cereal Grains, Alfalfa, Hay, &
Forages

USE RATE

1-2 pints/100 gallons of
spray mix
