

Water conditioning, surfactant plus penetrant, deposition

ALL-IN-ONE BLEND
OF WATER CONDITIONING,
METHYLATED SEED OIL, AND
SURFACTANTS

HOW IT WORKS

- GroTean™ is a water conditioning agent that acidifies water pH and buffers to manage hard water antagonism. High surfactant oil concentration of MSO plus NIS that reduces water tension, improves spreading along with deposition and leaf penetration.
- Blend of methylated seed oils, surfactants, and water conditioning agents designed for use with a broad range of pesticides.
- Addition of GroTean to a spray tank improves pesticide application by modifying the wetting and deposition characteristics of the spray solution resulting in a more even spray deposit.
- Contains a surfactant ingredient that assists with spreading and infiltration into the targeted leaf surface.

PRODUCT BENEFITS

- Lowers and buffers spray water pH
- Sequesters hard water cations (Ca, Mg, Al, Fe)
- Prevents hard water antagonism of herbicide solution
- Excellent spreader, wetter adjuvant
- Enhanced canopy spray deposition
- Approved tank mix adjuvants Enlist Duo

CROPS

Corn, Soybeans, Wheat and
Cereal Grains, Alfalfa, Hay,
and Forages

USE RATE

2 – 4 qt/100 gal
