

COMPLETE FOLIAR NUTRITION OF MACRO AND MICRONUTRIENTS FOR YOUR CROP

10-4-6 and Micros (Zn, B, Mn, Cu, Fe, Co) + Biostimulant*

*[Biologically extracted Kelp Extract or biologically extracted Ecklonia maxima]

HOW IT WORKS

MicroEdge Complete® is a full foliar nutritional tool that provides crops with macronutrients, micronutrients, and a biostimulant for complete nutritional in-season fertility. MicroEdge Complete provides growers with an excellent approach to boost crop performance by delivering multiple essential nutrients for growth and development at key times.

PRODUCT BENEFITS

NUTRIENT AVAILABILITY

- Additional chelation and complexing agents increase nutrient uptake of essential elements for better crop performance and higher yield potential
- Improved nutrient utilization through balanced nutrition

CROP HEALTH

- Promotes healthier plants, increased crop performance, and improved yield potential as a result of balanced nutrition
- Contains highly available micronutrients (zinc, manganese, copper, iron, cobalt, molybdenum, and boron) for balanced foliar nutrition that aids essential metabolic processes like photosynthesis
- Increases crop tolerance to abiotic stressors like cold temperatures and drought
- MicroEdge Complete's biostimulant improves nutrient uptake and utilization

EASE OF USE

- Compatible with most fertilizers, insecticides, fungicides, and herbicides for easy tank mix applications
- Wide window of application with positive performance

CROPS

Corn, Soybeans, Wheat and Cereal Grains, Alfalfa, Hay, & Forages

TIMING

Foliar Applications

USE RATE

1-6 pints/acre

Can be used alone or in tank mixtures. Please refer to the tank mix product label for application timing and restrictions.

WHAT IS CropPWR® TECHNOLOGY?

CropPWR® technology is an AcreEdge® proprietary biostimulant (Biologically extracted Kelp Extract or Ecklonia maxima) designed to boost crop performance and yield potential.
