

FOLIAR OR SOIL NUTRIENT

0-0-5

GUARANTEED ANALYSIS

Soluble Potash (K ₂ O)	5.00%
Sulfur (S)	1.00%
Iron (Fe)	0.20%
0.2% Chelated Iron (Fe)	
Manganese (Mn).....	0.25%
0.25% Chelated Manganese (Mn)	
Zinc (Zn).....	0.25%
0.25% Chelated Zinc (Zn)	

Derived from Potassium Acetate, Ammonium Thiosulfate, Iron EDTA, Manganese EDTA, Zinc EDTA and Kelp Extract (*Ecklonia maxima*) and Potassium Hydroxide

ALSO CONTAINS NON-PLANT FOOD INGREDIENTS

Active Ingredient

Soybean (<i>Glycine max</i>) protein hydrolysate.....	25%
Total Other Ingredients (Inert as Non-Plant Food Ingredients).....	75%

This chemical does not meet the hazardous criteria set forth by the 2012 OSHA Hazard Communication Standard (29 CFR 1910 1200)

GENERAL RECOMMENDATIONS

This product is a concentrated nutrient solution containing certain elements beneficial to crop development, yield and quality when applied as a properly timed foliar or soil application. Read and follow all label directions including **USE PRECAUTIONS** before using this product. Applications of this product should be part of a fertility program based upon soil and tissue testing data and is intended for use as a supplemental fertilizer treatment. Contact your Certified Crop Advisor for specific recommendations for your area.

USE PRECAUTIONS

KEEP OUT OF REACH OF CHILDREN

As with all materials, user should exercise precaution to avoid potential phytotoxicity including foliar burning. Precaution is advised if applying this product in combination with other materials, a jar test for compatibility is recommended before tank mixing with other products. The pH of any final spray solution should be checked and an appropriate amount of the solution should be applied to a small area of the intended crop to ensure plant compatibility prior to the planned application. User assumes full responsibility to ensure product, equipment and plant compatibilities. CAUTION: KEEP OUT OF REACH OF CHILDREN, HARMFUL IF SWALLOWED, PERSONAL PROTECTIVE EQUIPMENT RECOMMENDED, AND INTENDED FOR AGRICULTURAL USE. CONSULT MATERIAL SAFETY DATA SHEET FOR FURTHER INFORMATION. In the event of a spill, clean-up promptly using trained personnel and pre-planned procedures.

Density: 9.25 lbs/gal at 68°F

NOTICE OF WARRANTY: Seller warrants that this product conforms to the chemical description on the label thereof and is reasonably fit for purposes stated on such label only when used in accordance with the directions under normal use conditions. It is impossible to eliminate all risks inherently associated with the use of this product. Crop injury, ineffectiveness or other unintended consequences may result because of such factors as weather conditions, presence of other materials, or the manner of use or application, all of which are beyond the control of the Seller. IN NO CASE SHALL SELLER BE LIABLE FOR CONSEQUENTIAL, SPECIAL OR INDIRECT DAMAGES RESULTING FROM THE USE OR HANDLING OF THIS PRODUCT. ALL SUCH RISKS SHALL BE ASSUMED BY THE BUYER. SELLER MAKES NO WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE NOR ANY OTHER EXPRESS OR IMPLIED WARRANTY EXCEPT AS STATED ABOVE.

Information regarding the contents and levels of metals in this product is available on the internet at <http://www.aapfco.org/metals.html>

DIRECTIONS FOR USE

CropLift™ can be applied alone or as part of a tank-mix via the following methods:

Aerial Application – Apply 1-2 quarts per acre in a minimum of 3 gallons of water per acre.

Foliar Application – This product may be applied with all types of ground spraying equipment. Apply 1-2 quarts per acre in 3 or more gallons of water per acre. Landus recommends using a non-ionic surfactant in herbicide tank mixes including CropLift. Do not use this product with organosilicone surfactants or with any adjuvants or surfactants that lower pH of the tank mix to less than 4.5.

Soil Application – Apply 1-2 quarts per acre. This product may be applied to the soil by all types of soil spraying/injection equipment and through certain types of irrigation systems. If it will be applied with liquid ATS or other acidic fertilizers, dilute the ATS in water in the tank and then add CropLift to the tank mix. Do not premix CropLift with ATS or other acidic products prior to dilution in the tank water. Refer to the **IRRIGATION SYSTEM APPLICATION** section.

CROPS AND APPLICATION TIMINGS:

Alfalfa Hay and Forage Crops: After emergence on new plantings, or after cuttings on established plantings, when sufficient leaf area exists for good foliar spray interception.

Corn: At planting with starter fertilizer, and/or foliar applications at standard herbicide and early fungicide timing (typically at growth stages V4-V5) and/or late fungicide timing (typically growth stage VT).

Canola: After emergence, when sufficient leaf area exists for good foliar spray interception, up to onset of bolting growth stage.

Soybeans: At standard herbicide and/or fungicide timing (typically at growth stages V3-V5 and R1-R3, respectively).

Wheat, Rice, Barley, and other Cereal Grains: At top-dress fertilizer/herbicide/pre-jointing timing through flag-leaf fungicide application timing.

IRRIGATION SYSTEM APPLICATION

Applications can be made through certain irrigation systems including, but not limited to, low volume systems and typical agricultural sprinkler systems. The specific injection equipment and irrigation system must conform to all federal, state and local regulations pertaining to the fertilization of plants through an irrigation system. Accurate and properly calibrated injection equipment and an irrigation system that is operated at maximum distribution uniformity will help avoid plant injury and/or product ineffectiveness. For best results, with the exception of center pivot and lateral systems, apply this product toward the end of the irrigation set. Allow sufficient time for the product to be flushed completely out of the entire irrigation system prior to turning off the irrigation water.

STORAGE AND DISPOSAL

Store in a cool, dry area out of reach of children and animals, as well as out of direct sunlight during storage for extended amounts of time. Store in original container. Keep container tightly sealed when not in use. Do not contaminate water, food or feed by storage, disposal or cleaning of equipment. Store at temperatures above 32°F. Dispose of unused product and empty containers at an approved waste disposal plant in accordance with Federal, State and local regulations.
